YOUR FILE - V / RÉFÉRENCE

DATE

December 21, 1999

This will reply to your memo of December 10, 1999 concerning the use of the subject product.

Based on the information presently available, we would have no objection to the composition and intended use of this product on food contact surfaces in food processing facilities provided that:

- a) it is used in the minimum amount required to achieve the intended technical effect
- b) surfaces subject to direct contact with food are thoroughly drained and dried prior to re-use
- c) its use as directed will not leave a residual odour on food contact surfaces

T. Kwong
